SUMMARY

My excitement and curiosity in computer technology and programming is still off the charts! From the time my parents purchased our first Commodore64 and Atari 2600 I've been hooked. Learning DOS command line as a child etched fundamentals in me that helped lead me to this industry. Now, as a Frontend Developer, I have an insatiable desire to continue learning every day and apply those skills.

Having a close-knit network of developers/programmers in my corner is a great luxury I enjoy and can rely on for support, encouragement, and knowledge. I believe having fun and loving what you do every day is priceless!

WORK EXPERIENCE

Frontend Development - Self / Contractor

- Implementation of web applications in various frameworks and languages
- Ability to persevere and find solutions, utilizing numerous methods of research
- Creating and following workflow paths through platforms such as Azure, Agile, Kanban, Jira
- Building Ubuntu and Linux sub-systems, along with seamless MAC/Windows cross platform file structures
- Embracing that learning new skills is an ongoing feature of this field, with the desire to do exactly that
- Effective and continual communication skills focused on streamlining project goals

Business Owner | Team Lead - Commercial Facility Services

- Extreme skill in finding effective solutions for any challenge
- Ability to adapt to any role necessary to accomplish the intended target project
- Maintaining and adhering to strict and fast paced project deadlines and benchmark goals
- Laser focus on organizational skills, keeping all phases of business details and needs on track
- Being driven, punctual, and dependable despite outside influences or distractions

Service Management | Team Lead - Automotive Dealers

- Responsible for multimillion dollar yearly revenue departments
- Implementation and management of goal tracking and key metric monitoring
- Mentoring, training, and motivating all team members
- Deep dive data analyzation of all departmental parameters
- Extremely effective problem resolution skills along with the ability to identify the root cause of each challenge

Graphic Design | Creative Director - Bullseye Graphics

- Identifying client vision and directing adjustments if needed to hone results
- Initiating creatives and taking them from inception to deliverables
- Prioritization of content, ensuring intended effect
- Close collaboration with client and team members to plan, design and develop robust solutions
- Expert use of software such as: CorelDraw, Adobe Illustrator, Inkscape, PhotoShop, PhotoPaint, and many more

EDUCATION

The Odin Project | FreeCodeCamp | Codecademy

Taking this approach of learning has proven invaluable. Learning "on an island" fosters the need to sharpen research skills, problem resolution, and even your internal fortitude to continue. I have experienced significant growth and a much wider perspective of computer language and how to achieve desired outcomes despite innumerable challenges. Not only how to do it, but how to enjoy doing it!

PROJECTS

tobintirrell.com

My personal webpage that I developed in 100% vanilla coding. No theme, no builder, no help. It is a basic site, yes, but it holds much more than that to me. Taking a blinking cursor on a blank screen in Visual Studio Code and typing every single line of code to build it from scratch has taught me so much.

It has helped me to further my abilities in how to effectively research, how to persevere, how computers think, and how to jump in the pool and swim.

I intend to continually grow this site and improve every aspect of it.

Anagram Tool *(linked on my website)*

This was an interesting small project that one of my colleagues asked me to do. It demonstrates vanilla JavaScript coding and a few features or nuances of the language. This project has spawned an online and mobile application called SCRMBL, which is a fun word solving game. I am proud to have participated in the conception of that project.

It has also been a source of inspiration for another set of games that I intend to build in the near future.

React Website *(linked on my website)*

Another sample webpage that was used to implement React in the development of this site. The entire site was vanilla coded using React which merges the worlds of HTML and JavaScript. This site was used to learn and implement function calls that access database style information to auto populate on-screen elements to alleviate redundant code and excessive user input.

SKILLS

An ever growing and improving endeavor. My current skill set includes the following:

- | | | |
|--------------|-------------------------|-------------------|
| • HTML | • Visual Studio Code | • Linux |
| • CSS | • Azure DevOps | • Mac OS |
| • JavaScript | • Jira / Kanban / Scrum | • Windows OS |
| • React.js | • GitHub | • Microsoft Excel |
| • API's | • Command Line | • Microsoft Word |
| • .Json | • Ubuntu | • PowerPoint |

CONCLUSION

I would be amiss if I failed to thank you for your time and attention in reviewing my resume. As you search for the right candidate it is my hope that I am afforded the opportunity to demonstrate what an asset I would be to your organization.
